Version control & publishing

CORE COMPETENCIES

- UI & visual design
- Information design & data visualization
- Wireframing & prototyping (Figma)
- AI-assisted design workflows
- Prototyping & AI-assisted development
- Agentic AI & no-code tools
- Behavioral insights (psychology)
- Layout, typography & branding
- Data storytelling

LANGUAGES

English
Native

German
A2 · in progress

PROFILE

Ten years of visual craft. A degree in how people think. A habit of building what I design. I'm a designer focused on AI product and UX work, bringing a strong eye, a researcher's curiosity and hands-on fluency in AI tools and Figma. I make things that look good, make sense, and actually work.

EXPERIENCE

2014 – Present — **Freelance Art Director**
Independent

- Information design: 5 years creating infographics that turn complex data into visuals people grasp at a glance.
- Visual identity, campaign and digital design for businesses and non-profits across Europe and North America.
- Own projects end to end, from brief to final delivery.
- AI-assisted workflow: research synthesis, ideation, UI design and coding working prototypes with LLMs.

Selected clients: WebGears GmbH, Duflos Animal Shelter, Campus Studentenwohnungen, Frilufts

2013 – 2014 — **Associate Art Director** · Catapult Marketing
Concept and design for consumer brand campaigns. Client: Kraft Foods.

2013 — **Freelance Associate Art Director** · Wunderman
Campaign design for national consumer brands. Clients: DiGiorno, Burger King.

AI & PRODUCT PROJECTS

Reaction Timer Game
Browser game designed and built with AI coding assistants, published on GitHub.
